

DRUGLOO
INTERNATIONAL
CERTIFIED
DISTRIBUTOR

Easy to assemble and install

Designed for being covertly installed behind a standard WC and accessible from an adjoining room or large service duct.

The design of the unit permits the WC to be used as a normal WC, but can be simply changed to intercept all items flushed down the WC. Contents can then be inspected, washed, and recovered.

Semi-automatic where operators control all aspects of recovery process.

PROTECT THE HEALTH & SAFETY OF YOUR OFFICERS

Protect and prevent the spread and exposure to harmful diseases such as

Technical Support:

Drugloo unit are designed to be extremely robust, built from the highest quality components and manufactured in grade 316 stainless steel. They are also rigorously tested before shipping and you have a full 1-year manufactures warranty. This covers everything except misuse and/or abuse. If there are any issues then we provide support via phone and also video link. We also have units being built in the factory all the time so can give live demonstrations via Zoom or Teams.

DL6

All Drugloo units use a substance called DL6 which is an anti-microbial disinfectant which is specially developed for use in Drugloo units. The liquid has been de-foamed and unlike all other alternatives is not caustic and/or abrasive so will not damage the inner workings of the pipe work and diaphragms within the Drugloo unit. Each unit come with 10 Liters and there is an option to purchase more from Secure Technology Value Solutions.
